Invitation to the Second Symposium on Problems in the Optimization of Data Communication Systems

One session of the Symposium on problems in the optimization of data communication networks is to be devoted to software for networks. I believe that the work on protocols (1st, 2nd and 3rd level) and file transmission procedures are highly relevant. NWG participants should welcome the opportunity to inject their ideas into the published literature. Many NWG/RFC's already are in good enough shape for publication so don't hesitate to submit your drafts. Time is short, so prompt action is essential.

ACM IEEE

CALL FOR PAPERS

SECOND SYMPOSIUM ON PROBLEMS IN THE OPTIMIZATION OF DATA COMMUNICATION SYSTEMS

SIGCOMM of ACM and the Technical Committee on Computer Communications of the IEEE Computer Society are sponsoring the Second Symposium on Problems in the Optimization of Data Communications Systems to be held at Stanford University on October 20-22, 1971. The symposium will include the presentation of papers, panel discussions, and workshop sessions. The purpose is to bring together people engaged in computer communication system design, analysis, and research. The setting will be one where each participant can engage in a dialogue on problems of interest to him with his colleagues in the computer/ communications professional community.

Papers are being sought in the following areas:

Advances in Data Communication Networks
Computer Communication Technology
New Applications and Applications Models
Software Organization for Communications
Systems Modeling, Evaluation, Optimization
Interface Problems and Standards

Full drafts:

- may not exceed 5000 words
- must include an informative abstract

Detailed information will be supplied later concerning the final copy of accepted papers.

PAPERS SHOULD BE MAILED TO

V. CERF 213-825-4864
3804 BOELTER HALL -825-2368
UCLA ENGINEERING DEPT.
405 HILGARD ST.
LOS ANGELES, CALIFORNIA
90024

NO LATER THAN JUNE 15, 1971

Notification of final approval to authors will be given by JULY 21, 1971. Camera-ready copy of text plus figures must be received by August 21, 1971.

General information can be obtained by contacting the symposium chairman, P. E. JACKSON, [illegible], Bell Telephone Laboratories, Holmdel, New Jersey 07733 telephone (201) 949-2231.
